Slow Release Fertilizer
with Organic Nitrogen

Get the Edge with GreenEdge®

Beat the Heat with **GreenEdge®** Slow Release Fertilizer

Grow with Less Water

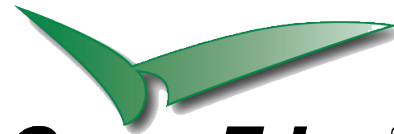

GreenEdge granules hold 10x their weight in water. By providing this additional water efficiency, it takes less water to grow your plants.

Leach Resistant Formulation

Dual-release mechanisms eliminate nutrient leaching.

Works in Any Climate

The dual-release mechanisms allow GreenEdge to provide nutrition regardless of temperature or moisture, so you can use it year round.

GreenEdge®
Slow Release Fertilizer
with Organic Nitrogen

GreenEdge® is a patented organic based slow release fertilizer that increases plant nutrition uptake efficiency while promoting plant growth with less water.

GreenEdge® is unlike any other organic based slow release fertilizers. The slow-release nutrient supply enhances plant growth while protecting the environment.

GreenEdge® acts as a bio-activator to increase microbial activity and replenish soil's nutrients and organic matter.

Benefits of Using **GreenEdge®**

- All season slow release fertilizer with organic nitrogen
- Perfect for use in all warm and drought prone climates
- GreenEdge will not burn your plants
- Does not need to be watered in
- Minimizes leaching and runoff of nutrients
- Great for use in areas subject to water restrictions
- Helps with water retention
